

Pumping Operation Equipment Catalogue: Pumping Equipment

GOULD PUMP UNIT

The Topline Gould Model 3415 Pump provides the best fluid handling products and service to customers.

With digital monitoring standard on the process pump, the ITT Goulds Pump is unique in both mechanical pump design and the adoption of smart technologies.

Features:

- Rigid Construction
- Up to 20 bar operational pressure
- Simple "in field" maintenance due to replaceable liner
- Optimal material selection due to engineered rotors
- Non-contact pumping elements, forced lubrication system
- Cooling system not required.

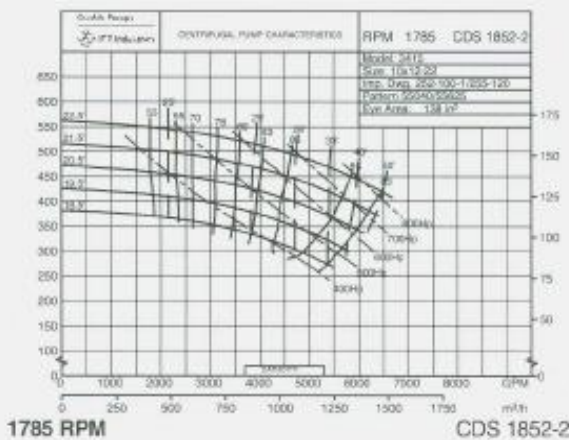

GOULD PUMP UNIT

SPECIFICATIONS:

Description:	10x12x22 single stage centrifugal pump, 12" suction, 10" discharge
Manufacturer:	Gould
Model:	3415
Max Flow Rate:	5700 GPM
Speed:	1780 RPM
Pressure:	247 PSI
TDH:	570
Power Rating:	800 HP
Weight:	1542 Kg

60 Hz Performance Curves Model 3415
