HIGH VOLUME PUMP UNIT

The PAI Model LNN-600-7000 Pump Package is designed for a broad range of pumping applications requiring high volume or high pressure.

The Pump is designed for extended operation in services where large capacities are required at relatively variable pressures.

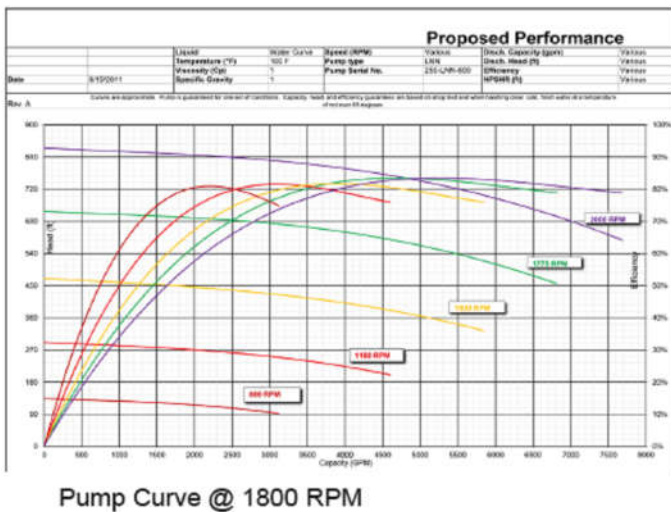

The standard LNN-600 Pump is powered by a Caterpillar Model 3508 DITA diesel producing 1000 HP @ 1,800 RPM.

Additionally, the Pump provides trouble-free, high-capacity capabilities with outstanding operating efficiency.
