

**Pipeline Processing Equipment Catalogue: Filtration Equipment**

**3000 “V” SLOT PIPELINE STRAINER**

Topline Pipeline Strainer is suitable for Onshore and Offshore operations and easy to maintain.

The closed vessel collects solid particles to be separated while passing a fluid through a removable screen. The screens can collect particles down to 0.001 inch in diameter. They can remove more than unwanted material.

**Features:**

- Non - Clogging Slots
- The inished element is a one piece structure of great strength
- Maximum inlet area
- Special backwashing feature
- Unibolt Swing Closure Access
